## Summary

My story starts years ago when a good friend of mine introduced me to Python. As I emerged into this new universe I completely absorbed myself into learning how to code. Since then I have transitioned to web development, where I have found my true passion. I have dedicated the past 5 years to teaching myself web development and I'm eager to begin an exciting new career where I can continue to learn and make use of my skill set.

## Experience

**Elite Clothing** - <https://main.d3v4vsd52vznw2.amplifyapp.com/>

A full e-commerce web application with a versatile shopping interface, a working checkout form with stripe integration, and user profiles that save customer data and rely on AWS Authentication and 2-step verification.

**EZ Budget** - <https://durandev.net/EZBudget/>

A budgeting application that uses PHP and mySQL to store income and expense data for the user. Offers customizable profiles, easy to use interface and a fully responsive design.

**DStudios** - <https://durandev.net/DStudios/>

A fun and immersive web page designed to engage the user in exciting animations, horizontal scrolling, and beautifully placed lorem ipsum.
